Job profile and Responsibilities

The jobs and responsibilities undergone by me at Dnata (Emirates group)and Siemens are as follows:

- Safety: Continue support to build sustainable safety culture within the assigned section. Attend weekly safety briefings/ meetings. Always Practice safety at work by following all applicable procedures - using correct tools, wearing appropriate PPE. No personal injury to self/others or damage to equipment/facility due to violation of procedures. Report incident/near misses as and when identified.
- Operations: Enhance our efficiency & response time to deliver service excellence safely. Providing prompt support to the operations by effectively rectifying faults within 10 minutes of the reporting time. Repairing and releasing the equipment in minimum down time, thereby increase in serviceability of the equipment. Strictly adhere to the approved shift schedule by arriving and leaving the allocated site in accordance with

- shift starts and end times. All faults should be checked physically at location before resetting through Cargo Control System (CCS).
- Maintenance & Repair: Carryout Effective Maintenance & Repair. Carryout maintenance by following safety procedures as per job plan/work order. Fault diagnosis and carry out rectification. Provide job details for updating WO. Highlight tools requirement as and when required. Carry out a detailed inspection of the equipment before releasing the same to operation.
 - Housekeeping & tools inventory: Keep workplace neat and tidy. After job completion, ensure maintenance area/equipment is clean and free from FOD. Carryout daily housekeeping and dispose-off waste as per waste disposal procedure. Conduct tools inventory & notify any discrepancies.
 - Maintenance Improvement: Look for ways to improve maintenance efficiency. Highlight tools requirement. Suggest ideas to improve maintenance efficiency and reliability.
 - Reports & Work Orders: Reports and work order updates. Preparing shift activity reports & work order updates. Record all the maintenance activities carried out during the shift correctly and completely on the work orders including details of work carried out, spares used and labour hours immediately after the completion of task.
